Coding Skills

HTML5, CSS3, JavaScript, PHP, MySQL, Processing and probably some other ones

Work Experience

Strike Force Protective Services (2010-Present)

Ran the NYC division of this concert security company which includes over 100 employees. Made monthly schedules for each employee to ensure proper coverage at over 800 events per year. Worked at countless concert events as a supervisor including Electric Zoo, Governor's Ball, and Hot 97 Summerjam. Conducted interviews and hired employees. Trained staff in customer service skills and show procedures and policies. I taught myself to code and developed an online scheduling platform to fit the unique needs of my job.

ABKCO Music & Records (2009-2010)

Worked in the Licensing department on synch license marketing strategies, contract preparation, registering intellectual property, research, and going paperless.

In my formative years I did a stint as a drive-thru bank teller, 2 summers paving roads, interned at the place that runs Aerosmith's fan club, carried trays of hors d'oeuvres at museum benefits. Before that I used to wash dishes and take out the trash and other things at home. I guess I still do that stuff except make my bed because I never saw the point.

Education

Northeastern University (2005-2009)

Bachelor of Science in Music Industry with a minor in Business Administration

The Rest

I love music like water loves the sky.

I spend time rock climbing, running, playing Starcraft, and hanging out with Katie, a cool person.
